8. Reminder of former pre-announcements

8.1 Extended format Swiss Valoren number

The systems at Telekurs issuing the Swiss Valoren numbers will be modified in the way that after they have reached number CH: 4'999'999, they will switch to CH: 10'000'000 and start assigning 8-digit Swiss Valoren numbers. This modification is expected to take place in the 4th quarter of 2008. In view of the future, we recommend not to limit the numbers exactly to 8 digits, but to opt for a format of 9 characters. 9 characters correspond to the basic number of the ISIN.

The announced migration of certain Asian hybrid instruments from EC 245 to exchange codes 485, 2836 – 2850 was implemented on **7 April 2008**.

However, the instruments on EC 245 defined to be migrated to exchange code 2851 was not executed. The new migration date is 26 May 2008 and might be subject to change. An instrument list (migrationfromEC245toEC2851) can be provided upon request.

Chicago Mercantile Exchange (CME) has acquired Chicago Board of Trade (CBOT) and supplies the CBOT data on CME market data platform now. This takeover led to the announced transfer of exchange codes, which has been carried out with the **exception of the metal contracts, which will remain on EC 789 until further notice.**
